

Study of Visa Policy

Group 6
Enting Zhou, Gianna Liu, Jaya Anand,
Siddharth Dey, Richard Gross

What do we mean by Visa Policy?

- Visas allows holder to stay in country

Different Types of Travel Requirements

- Need Visa

- Visa unneeded until after certain amount of days

- No visa needed to stay

- No admission at all

Data Collection

Data Collection

- Main Data Source: <https://www.passportindex.org>
 - Contains comprehensive data for visa policy for 199 countries
- Auxiliary Data Source 1: <https://www.kaggle.com/datasets/fernando/countries-of-the-world>
 - Contains data for basic information for countries, such as population, GDP, literacy.
- Auxiliary Data Source 2: <https://www.kaggle.com/datasets/sujaykapadnis/world-freedom-index>
 - Contains data for global political rights and civil liberties statistics for 195 countries
- Auxiliary Data Source 3: <https://www.kaggle.com/datasets/ddosad/global-terrorism-index-2023>
 - Contains data for terrorism activities, such as terrorism rank, # of incident, fatalities...

Exploratory Data Analysis

Number of “Outgoing Visa Travel Free Countries”

- Referring to the number of countries each country can travel to without a travel visa

Number of “Incoming Visa Travel Free Countries”

- Referring to number of countries from which other countries accept entry without a visa

Simple Number Counts

Distribution of Number of Outgoing Travel-Visa-Free Countries

Distribution of Number of Incoming Travel-Visa-Free Countries

Simple Number Counts

Distribution of Number of Outgoing Travel-Visa-Free Countries

Distribution of Number of Incoming Travel-Visa-Free Countries

Simple Number Counts

Distribution of Number of Outgoing Travel-Visa-Free Countries

Distribution of Number of Incoming Travel-Visa-Free Countries

Outgoing and Incoming vs. GDP, Infant Mortality, Literacy, Birth Rates

Counts Versus Basic Attributes - GDP

Boxplot of GDP (\$ per capita) by Number of Outgoing Visa-Free Countries

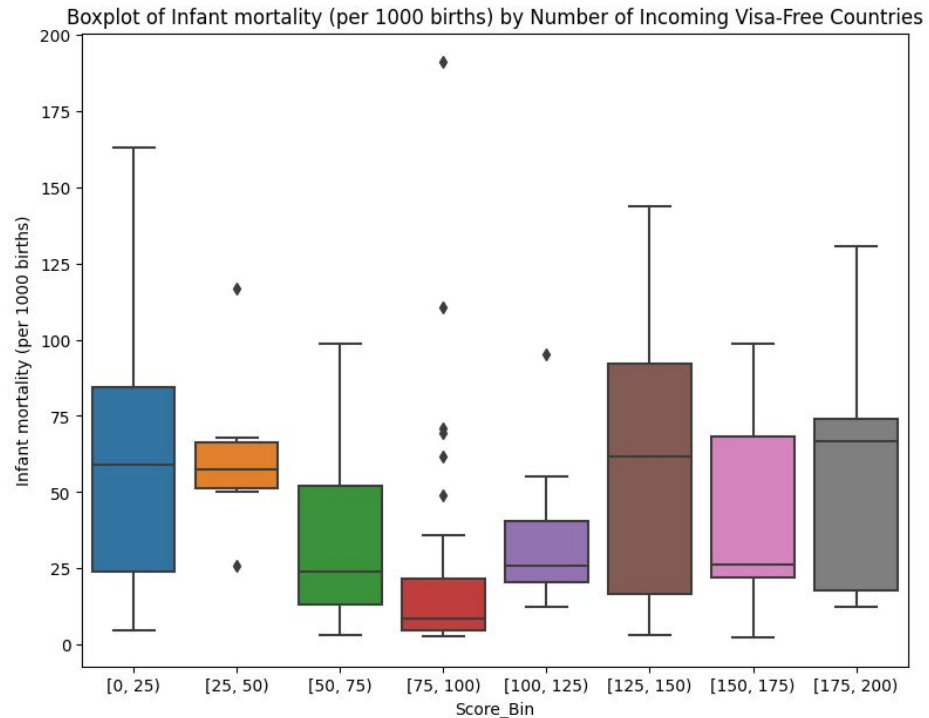

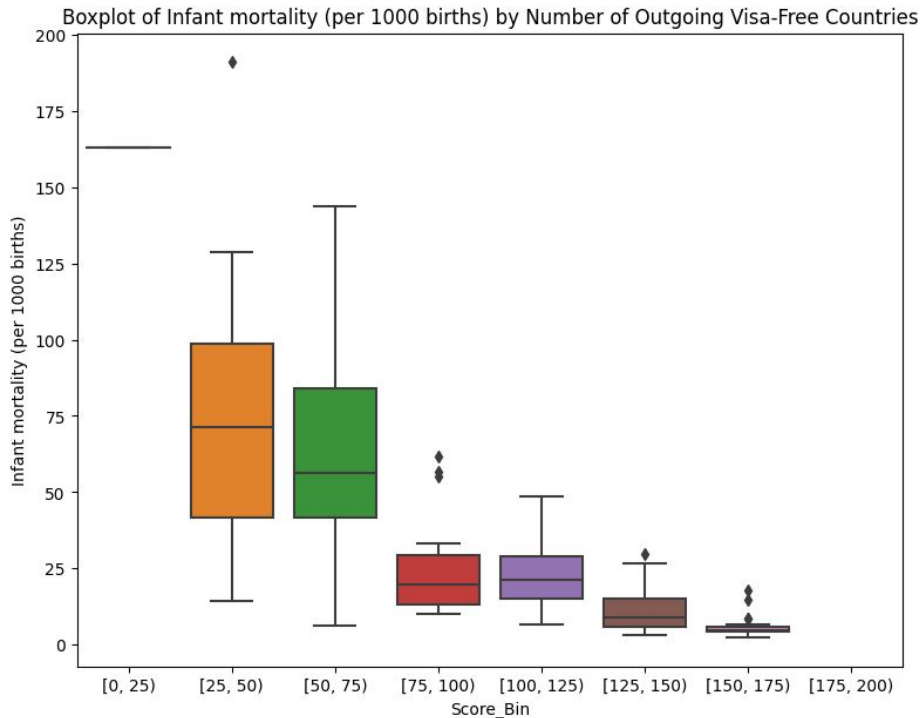

Boxplot of GDP (\$ per capita) by Number of Incoming Visa-Free Countries

Countries that have higher GDP have more travel-visa-free countries.

Counts Versus Basic Attributes

- Infant Mortality

Countries that have lower infant mortality have more travel-visa-free countries.

Counts Versus Basic Attributes - Literacy

Boxplot of Literacy (%) by Number of Outgoing Visa-Free Countries

Boxplot of Literacy (%) by Number of Incoming Visa-Free Countries

Countries that have higher literacy have more travel-visa-free countries.

Counts Versus Basic Attributes - Birth Rates

Boxplot of Birthrate by Number of Outgoing Visa-Free Countries

Boxplot of Birthrate by Number of Incoming Visa-Free Countries

Countries that have lower birth rate have more travel-visa-free countries.

Key Findings

- Countries that have more access to other countries without travel visa also have...
 - Higher GDP
 - Lower infant mortality
 - Higher literacy
 - Lower birth rate
- Countries that are more welcome to tourists have...
 - ??? No trend found

Migration, Political Freedom

Migration

Does migration lead to a country achieving travel-visa-free status?

- Heatmaps and contour plots reveals a notable absence of significant correlation between migration and travel-visa-free scores.
- Visualizations suggest that migration factors do not prominently influence the travel-visa-free scores for countries.

Political Freedom

Does political freedom lead to a country achieving travel-visa-free status?

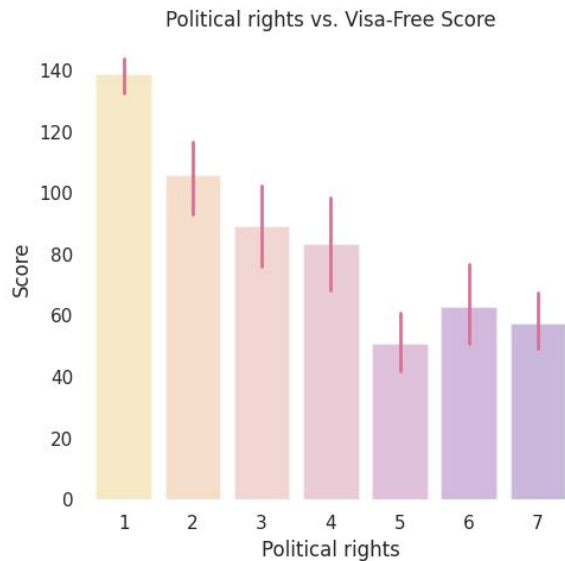

- A weak positive correlation between the indicators of political freedom and the score of travel-visa-free.

Region, Freedom Status and Development vs. Travel-Visa-Free Scores

- Regional Trends: Europe consistently leads in visa-free scores, followed by the Americas, Oceania, Asia, and Africa.
- Freedom Classification: "Free" countries display the highest visa-free scores, followed by "Partially Free," and "Not Free," indicating a positive correlation between freedom status and visa-free scores.
- Development Impact: Developed countries generally boast higher visa-free scores, showing a positive correlation between a country's development level and its visa-free access.

Civil Liberties and Political Rights vs. Travel-Visa-Free Scores

- Civil Liberties: Higher civil liberties in a country correspond to higher visa-free scores.
- Political Rights: Stronger political rights align with higher visa-free scores

OLS Regression Results

OLS Regression Results

Dep. Variable:	Score	R-squared:	0.634
Model:	OLS	Adj. R-squared:	0.629
Method:	Least Squares	F-statistic:	107.6
Date:	Sun, 26 Nov 2023	Prob (F-statistic):	1.96e-40
Time:	21:30:47	Log-Likelihood:	-887.00
No. Observations:	190	AIC:	1782.
Df Residuals:	186	BIC:	1795.
Df Model:	3		
Covariance Type:	nonrobust		
	coef	std err	t P> t [0.025 0.975]
const	148.1959	3.886	38.138 0.000 140.530 155.862
Civil_Liberties	-12.2266	2.838	-4.308 0.000 -17.826 -6.627
Political_rights	-1.6468	2.445	-0.674 0.501 -6.470 3.176
is_Developed_Country	-32.0292	4.684	-6.838 0.000 -41.270 -22.789
Omnibus:	1.878	Durbin-Watson:	1.875
Prob(Omnibus):	0.391	Jarque-Bera (JB):	1.652
Skew:	-0.020	Prob(JB):	0.438
Kurtosis:	3.455	Cond. No.	14.4

Regression Insights:

- R-squared: 0.634
- p-value very small, indicating overall model significance

Variable Impact:

- 'Civil_Liberties' and 'is_Developed_Country' significantly affect 'Score.'
- 'Political_rights' lacks a significant relationship with 'Score.'
- Reduced freedom or non-developed status correlates with lower 'Score.'

Notes:
[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.

Political Freedom

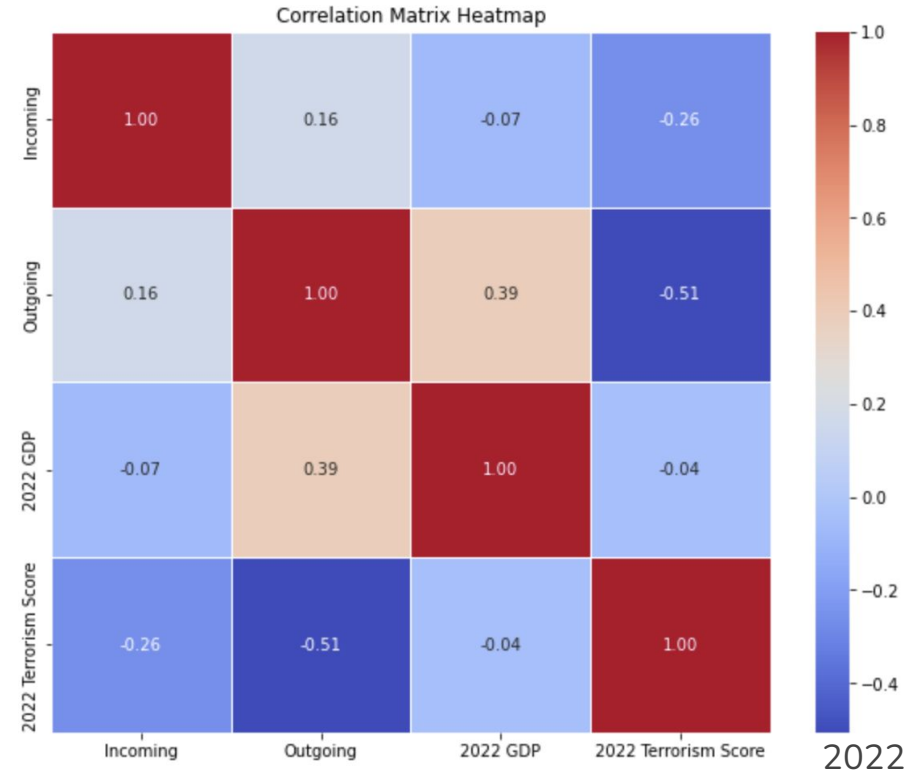

Exploring the Nexus Between Political Freedom and Travel-Visa-Free Scores

Key Findings:

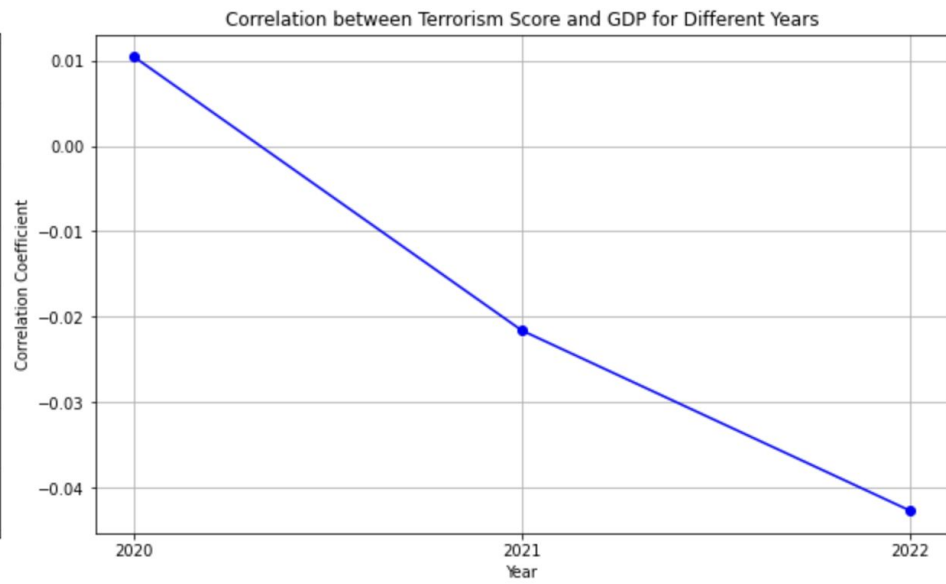

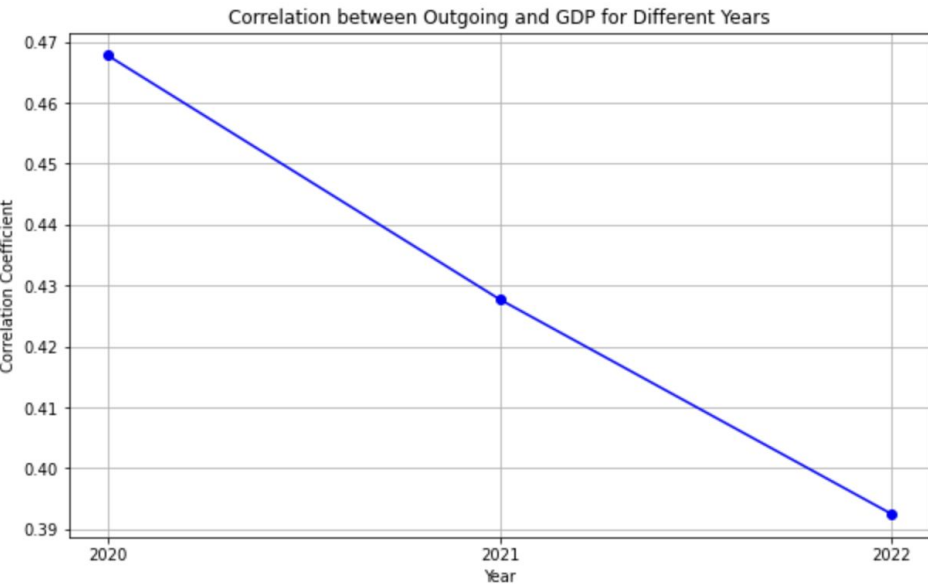

- Weak positive correlation between political freedom indicators and visa freedom scores.
- European and other 'free' and developed nations tend to have higher visa-free scores
- Positive correlation between civil liberties and visa-free scores, and stronger political rights tends to align with higher visa-free scores.
- Regression analysis confirms that trends in travel-visa-free scores are influenced by civil liberties and development status

Terrorism & GDP Vs Visa-free

- Strong negative correlation between Terrorism score and Outgoing VISA.
- Terrorism Scores and Incoming VISA is also negatively correlated.
- There is a strong positive correlation between GDP and Outgoing VISA.
- There is a weak negative correlation between GDP and Incoming VISA.

- Strong positive correlation between GDP and Outgoing VISA. Both GDP and Outgoing VISA increase over the years.
- The correlation between Terrorism Score and GDP drops from a positive correlation to a negative correlation over the years. GDP increases while Terrorism score decreases over the years.

Correlation between Terrorism Score and Incoming for Different Years

Correlation between Terrorism Score and Outgoing for Different Years

Correlation between Incoming and GDP for Different Years

- The negative correlation between Terrorism Score and Incoming VISA becomes stronger over the years.
- The negative correlation between Terrorism Score and Outgoing VISA becomes weaker over the years.
- The negative correlation between Incoming VISA and GDP becomes weaker over the years.

COVID & Outgoing VISA

COVID Cases (Inner) vs Outgoing Visas (Outer) by Continent (2020)
